Olive Kitteridge Elizabeth Strout 2008-03-25 WINNER OF THE PULITZER PRIZE • THE EMMY-AWARD-WINNING HBO MINISERIES STARRING FRANCES McDORMAND, RICHARD JENKINS, AND BILL MURRAY In a voice more powerful and compassionate than ever before, New York Times bestselling author Elizabeth Strout binds together thirteen rich, luminous narratives into a book with the heft of a novel, through the presence of one larger-than-life, unforgettable character: Olive Kitteridge. At the edge of the continent, Crosby, Maine, may seem like nowhere, but seen through this brilliant writer’s eyes, it’s in essence the whole world, and the lives that are lived there are filled with all of the grand human drama—desire, despair, jealousy, hope, and love. At times stern, at other times patient, at times perceptive, at other times irascible, Olive Kitteridge, a retired schoolteacher, deplores the changes in her little town and in the world at large, but she doesn’t always recognize the changes in those around her: a lounge musician haunted by a past romance: a former student who has lost the will to live: Olive’s own adult child, who feels tyrannized by her irrational sensitivities; and Henry, who finds his loyalty to his marriage both a blessing and a curse. As the townspeople grapple with their problems, mild and dire, Olive is brought to a deeper understanding of herself and her life—sometimes painfully, but always with ruthless honesty. Olive Kitteridge offers profound insights into the human condition—its conflicts, its tragedies and joys, and the endurance it requires. NAMED ONE OF THE BEST BOOK OF THE YEAR BY People • USA Today • The Atlantic • The Washington Post Book World • Seattle Post-Intelligencer • Entertainment Weekly • The Christian Science Monitor • San Francisco Chronicle • Salon • San Antonio Express-News • Chicago Tribune • The Wall Street Journal “Perceptive, deeply empathetic . . . Olive is the axis around which these thirteen complex, relentlessly human narratives spin themselves into Elizabeth Strout’s unforgettable novel in stories.”—O: The Oprah Magazine “Fiction lovers, remember this name: Olive Kitteridge. . . . You’ll never forget her . . . [Elizabeth Strout] constructs her stories with rich irony and moments of genuine surprise and intense emotion.”—The Economist, powerful stuff . . . USA TODAY BONUS: This edition includes an excerpt from Elizabeth Strout’s The Burgess Boys. Popular Science 1932-02 Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

Lord of the Flies William Golding 2003-12-16 Golding’s iconic 1954 novel, now with a new foreword by Lois Lowry, remains one of the greatest books ever written for young adults and an unforgettable classic for readers of any age. This edition includes a new Suggestions for Further Reading by Jennifer Buehler. At the dawn of the next world war, a plane crashes on an uncharted island, stranding a group of schoolboys. At first, with no adult supervision, their freedom is something to celebrate. This far from civilization they can do anything they want. Anything. But as order collapses, as strange howls echo in the night, as terror begins its reign, the hope of adventure seems as far removed from reality as the hope of being rescued.

Building Model Boats - Including Sailing and Steam Vessels Paul N. Hasluck 2016-12-09 This vintage book is a complete guide to designing and building model boats, with information on tools and equipment, rigging, fitting engines, and many other related aspects. Beginner's Guide to Building Ships in Bottles William Sheridan 2007 William Sheridan has been making models for 35 years. These include model trains, plastic models, wooden ships and numerous ship-in-the-bottle models. He is a recreational sailor and has crewed for many races on Long Island Sound. He is an engineer by trade and has held the position of engineering manager for 24 years. He holds over 10 patents and has published several technical articles. The unique blend of sailing, model making and engineering background have enabled him to write this book with the first-time ship modeler in mind.

Controversy Mapping Tommaso Venturini 2021-12-01 As disputes concerning the environment, the economy, and pandemics occupy public debate, we need to learn to navigate matters of public concern when facts are in doubt and expertise is contested. Controversy Mapping is the first book to introduce readers to the observation and representation of contested issues on digital media. Drawing on actor-network theory and...
digital methods, Venturini and Munk outline the conceptual underpinnings and the many tools and techniques of controversy mapping. They review its history in science and technology studies, discuss its methodological potential, and unfold its political implications. Through a range of cases and examples, they demonstrate how to chart actors and issues using digital fieldwork and computational techniques. A preface by Richard Rogers and an interview with Bruno Latour are also included. A crucial field guide and hands-on companion for the digital age, Controversy Mapping is an indispensable resource for students and scholars of media and communication, as well as activists, journalists, citizens, and decision makers.

Ships-in-bottles 1971 In an era when sea voyages lasted months and even years, off-watch sailor men occupied themselves creating bits of nautical art from whatever raw material came to hand – wood, rope, yarn, and of course, on whaling ships, the teeth and bones of whales and walrus. It is not surprising then that an empty bottle might have piqued the imagination of some long-gone salt and led him to devise the way of displaying miniature ships described in this book.

Refugee 2017-07-25
Alan Gratz
A tour de force from acclaimed author Alan Gratz (Prisoner B-3087), this timely -- and timeless -- novel tells the powerful story of three different children seeking refuge. A New York Times bestseller! Josef is a Jewish boy living in 1930s Nazi Germany. With the threat of concentration camps looming, he and his family board a ship bound for the other side of the world . . . Isabel is a Cuban girl in 1994. With riots and unrest plaguing her country, she and her family set out on a raft, hoping to find safety in America . . . Mahmoud is a Syrian boy in 2015. With his homeland torn apart by violence and destruction, he and his family begin a long trek toward Europe . . . All three kids go on harrowing journeys in search of refuge. All will face unimaginable dangers -- from drownings to bombings to betrayals. But there is always the hope of tomorrow. And although Josef, Isabel, and Mahmoud are separated by continents and decades, shocking connections will tie their stories together in the end.This action-packed novel tackles topics both timely and timeless: courage, survival, and the quest for home.

A Nuclear Engineer in the Twentieth Century 2005
Robert William Kupp
How does a chemical engineer, discharged from the Navy, drafted into the Army and assigned to the Medics, get on the Manhattan Atom Bomb Project and become a Nuclear Engineer in the Twentieth Century? With a great deal of luck and a little talent. In addition to telling this story, the book is written for a lay audience, but for someone having technical and scientific interests, and wanting to better understand the development of nuclear technology in the US. Radiation safety, power economics, risk/benefit analyses, and the societal issues of nuclear waste disposal, including such politically non-touchable areas as "How many dollars to save a life?" and relatedly - "How safe is safe enough?" -- are all discussed. Mr. Kupp's anecdotes of his youth, his home life, and his 30-year sailing history, all contribute to the realism of the book and round out the story of his life to more than just a technical career.

Junk Raft 2017-07-04
Marcus Eriksen
An exciting account of a scientist's expedition across the Pacific on a home-made "junk raft" in order to learn more about plastic marine pollution. A scientist, activist, and inveterate adventurer, Eriksen and his co-navigator, Joel Paschal, construct a "junk raft" made of plastic trash and set themselves adrift from Los Angeles to Hawaii, with no motor or support vessel, confronting perilous cyclones, food shortages, and a fast decaying raft. As Eriksen recounts his struggles to keep afloat, he immerses readers in the deep history of the plastic pollution crisis and the movement that has arisen to combat it. The proliferation of cheap plastic products during the twentieth century has left the world awash in trash. Meanwhile, the plastics industry, with its lobbying muscle, fights tooth and nail against any changes that would affect its lucrative status quo, instead defending poorly designed products and deflecting responsibility for the harm they cause. But, as Eriksen shows, the tide is turning in the battle to save the world's oceans. He recounts the successful efforts that he and many other activists are waging to fight corporate influence and demand that plastics producers be held accountable. Junk Raft provides concrete, actionable solutions and an empowering message: it's within our power to change the throw-away culture for the sake of our planet.

Campus 1983
Marcus Eriksen
An exciting new text details all the tricks of the trade and secrets involved in building these unique miniature sailing vessels. Capt. Dan teaches builders to understand the basic principals involved in building these tall ship replicas. After reading this heavily illustrated text, readers should have a good understanding of how to design rig and build both square sailed as well as fore and aft rigged vessels. They will then be able to apply these basic principles and techniques to build any type of sailing ship they choose. Please note that there are many different techniques used by different builders in creating their ship models. Some use elaborate mast hinges while others contend with a maze of rigging lines which all run through and under the hull. This book teaches Capt. Dan's basic and the straightforward simple techniques that the authors uses on all of his ship in a bottle models. These basics can be enhanced and modified as model builders become more proficient. Capt. Dan has included a showcase of ship in bottle images from some of the best master model builders in the world. Anyone that is interested in maritime history, sailing or just loves the sea, will enjoy crafting and then displaying their own nautical ship in a bottle.
